Vehicle Tracking Essentials

Course Description:

This course covers Autodesk's extensive transportation analysis and design solution for analyzing and incorporating maneuvers for vehicles of all sorts. It covers the Vehicle Tracking User Interface and specialized tools for parking lot layout, roundabout design, and swept path analysis. It teaches how to create and edit paths using different available options, and how to check for clash locations.

Length:	1 day
Times:	8:30 - 4:30
PDH Credit Hours:	6.5 hours
