Vehicle Tracking Essentials Class

Course Description:

Vehicle Tracking is a comprehensive transportation analysis and design solution for vehicle swept path analysis. This course will explore swept-path analysis, parking lot layout and roundabout design within the context of various project types. Additionally, we will explore how the Civil 3D model can be considered within these elements.

Prerequisites: This course presumes you have working knowledge of: The Windows environment, Design/Drafting tasks and terminology, and Civil 3D tasks and terminology.

Length:	1 day
Times:	8:30 - 4:30
PDH Credit Hours:	6.5 hours
